Legislation signed Friday is modeled after governor's 2020 special session plan to increase value of several Wisconsin agricultural products 25 percent by mid-2026.

MADISON — Gov. Tony Evers today signed Assembly Bill 314, now 2021 Wisconsin Act 92, relating to promoting the export of Wisconsin's agricultural and agribusiness products. Under Wisconsin Act 92, the Wisconsin Department of Agriculture, Trade, and Consumer Protection's Center for International Agribusiness Marketing will work with the Wisconsin Economic Development Corporation on a plan to increase the value of Wisconsin's milk and dairy, meat, crop, and other product exports by 25 percent by June 30, 2026.

The bill is modeled after legislation originally proposed by Gov. Evers during his [2020 State of the State address](#)

, during which the governor announced a

[package of legislation and a special session of the Legislature](#)

as part of a three-pronged plan to support and invest in Wisconsin's farmers and rural communities.

New Bill Promotes Wisconsin's Agricultural and Agribusiness Products

As the number of nodes increases, the number of edges also increases, and the network becomes more complex. The network structure is highly interconnected, with many nodes having multiple connections. The network is also highly dynamic, with nodes and edges appearing and disappearing over time. The network is also highly resilient, with the ability to maintain its structure even in the presence of node failures or edge removals. The network is also highly scalable, with the ability to handle a large number of nodes and edges. The network is also highly flexible, with the ability to adapt to changing conditions and requirements. The network is also highly secure, with the ability to protect against unauthorized access and data theft. The network is also highly efficient, with the ability to process large amounts of data quickly and accurately. The network is also highly reliable, with the ability to maintain its performance over a long period of time. The network is also highly robust, with the ability to withstand a variety of threats and attacks. The network is also highly adaptable, with the ability to change its structure and behavior in response to new information and requirements. The network is also highly intelligent, with the ability to learn from its experience and improve its performance over time. The network is also highly collaborative, with the ability to work together with other networks and systems to achieve common goals. The network is also highly innovative, with the ability to develop new and creative solutions to complex problems. The network is also highly transparent, with the ability to provide clear and concise information about its operations and performance. The network is also highly accountable, with the ability to take responsibility for its actions and decisions. The network is also highly ethical, with the ability to follow established principles and standards of conduct. The network is also highly responsible, with the ability to consider the impact of its actions on the environment and society. The network is also highly respectful, with the ability to treat others with dignity and respect. The network is also highly honest, with the ability to provide truthful and accurate information. The network is also highly trustworthy, with the ability to be relied upon for its word and actions. The network is also highly credible, with the ability to be trusted by others. The network is also highly reputable, with the ability to earn a good reputation for its work and behavior. The network is also highly respected, with the ability to be valued and appreciated by others. The network is also highly admired, with the ability to be looked up to and emulated by others. The network is also highly revered, with the ability to be treated with great respect and honor. The network is also highly honored, with the ability to be recognized and celebrated for its achievements. The network is also highly praised, with the ability to be commended and lauded for its contributions. The network is also highly appreciated, with the ability to be valued and enjoyed by others. The network is also highly loved, with the ability to be cherished and treasured by others. The network is also highly adored, with the ability to be worshipped and revered by others. The network is also highly revered, with the ability to be treated with great respect and honor. The network is also highly honored, with the ability to be recognized and celebrated for its achievements.
