Both have 47 percent of likely voters. The main change from the last poll appears to be a shift in support from Walker to Burke on the part of independent voters. Partisan voters remain loyal to their parties.

MILWAUKEE – A new Marquette Law School Poll released today finds Republican Gov. Scott Walker and Democratic challenger Mary Burke tied in the Wisconsin governor's race, with 47 percent of likely voters supporting each candidate.

Another 4 percent say that they are undecided or that they do not know whom they will support, while fewer than 1 percent say that they will vote for someone else. Likely voters are those who say that they are certain to vote in the November election.

Among registered voters, Walker receives 48 percent and Burke 45 percent, with 5 percent undecided and fewer than 1 percent saying that they will vote for someone else.

In the previous Marquette Law School Poll, conducted Sept. 25-28, Walker held a 50-45 edge over Burke among likely voters, while 46 percent of registered voters supported Walker to Burke's 45 percent support.

The main change from the last poll appears to be a shift in support from Walker to Burke on the part of independent voters. Among likely voters who think of themselves as independents, Burke receives 45 percent support to Walker's 44 percent. In the Sept. 25-28 poll, independents supported Walker by 53 percent to Burke's 40 percent.

## New Poll Has Mary Burke and Scott Walker Tied Again

Written by GBP Staff Wednesday, 15 October 2014 15:30 - Last Updated Wednesday, 15 October 2014 16:55

Partisan voters remain loyal to their parties, with Walker winning 96 percent of Republican likely voters and Burke winning 94 percent of Democrats, barely changed over the past two weeks. Just 4 percent of Republicans are crossing over to vote for Burke while 3 percent of Democrats are voting for Walker.

The gender gap, which was exceptionally strong in the previous poll, has all but vanished in this poll. Among likely voters, men favor Walker by a 48-46 percentage-point margin while women favor Burke 48-47.

The poll interviewed 1,004 registered voters and 803 likely voters by landline and cell phone Oct. 9-12. For the full sample of 1,004 registered voters, the margin of error is +/- 3.2 percentage points. The margin of error for the sample of 803 likely voters is +/- 3.5 percentage points.

## **Happ and Schimel Also Tied**

In the race for attorney general, among likely voters, Republican Brad Schimel and Democrat Susan Happ each receive support from 42 percent, with 16 percent saying that they are undecided or don't know for whom they will vote. Among registered voters, both candidates receive 39 percent support, with 19 percent yet to choose a candidate.

## Photo ID for voting

In the wake of the U.S. Supreme Court order issued late on Thursday, Oct. 9, whose effect is to block Wisconsin's photo ID law for this election, public awareness of what is required to vote shifted rapidly over the four-day period of the poll.

Among likely voters, 82 percent of respondents interviewed on Thursday said that an ID would be required to vote, while 13 percent said it would not and 5 percent said they didn't know.

## New Poll Has Mary Burke and Scott Walker Tied Again

News of the change in policy spread rapidly after the Thursday evening decision. Among likely voters interviewed Friday through Sunday, 68 percent correctly said no ID would be required, while 26 percent still thought one would be and 6 percent said they didn't know.

Voters also rapidly learned that the U.S. Supreme Court had entered an order on the issue. Among respondents interviewed Friday through Sunday, 67 percent said they knew the Supreme Court had issued an order while 20 percent believed it had not and 13 percent said they didn't know.
