MADISON - The President of the United States is off his rocker.

Yesterday, he gave a 46-minute speech that was the scariest I've ever read. And the mainstream media downplayed the shocking part: that Trump explicitly said that the election should be overturned. Here's what I wrote about this, and about calls from Gen. Flynn and others for Trump to declare martial law:

Don't Ignore Trump's Psychotic Speech

I also posted a critique of Trump's groundless lawsuits right here in Wisconsin, which also seek to overturn the will of the people:

Trump's Bogus Wisconsin Lawsuits

Trump is taking the country through very treacherous waters right now, and we ignore this threat at our peril.

Thanks for reading these two items, for defending our democracy!

Best,
