MADISON - The decision by the Wisconsin Supreme Court, late last Friday, to impose the rigged Republican maps on us is one of the most infuriating in recent memory.

Infuriating because it violates the separation of powers and the people's will.

Justice Brian Hagedorn was especially pathetic in his surrender to his nasty conservative colleagues.

I write about all this here: [Hagedorn Blinks on Maps](#) .

But rest assured, we will continue to fight to ban gerrymandering in Wisconsin until victory is won.

We'll also keep tracking all the money in our politics.

Our online individual contributor database is up to date through December 31, 2021, for all current state office holders, LCCs and their segregated funds. Rebecca Kleefisch is in there too.
