

MADISON, WI - Happy Earth Day!

Our staff put out a thorough report this week on how, during the Walker Administration, Wisconsin shirked its obligations to combat climate change and to protect the environment. Here's our press release, with a link to the report:

[Wisconsin GOP Leaders Added Fuel to Climate Change Fire, WDC Report Shows](#)

And today, the Wisconsin Examiner printed my op-ed, which summarized the report, showed the progress that Gov. Evers has made on this issue, and briefly discussed the impact of the coronavirus on the environment:

[An Earth Day Assessment of Wisconsin's Environmental Progress](#)

Lastly, I wanted to share with you something I just wrote. It's about the MacIver Institute, here in Wisconsin, ginning up the protests against the governor's "Safer at Home" order. MacIver's idolatry of the "free market" extends to flagrantly jeopardizing lives in Wisconsin, as I argue here:

[The Lethal Idiocy of the MacIver Institute](#)

I hope you share my outrage about this.

Best,

Matt Rothschild
