Green Bay, Door County area has four major projects benefitting from Federal funding.

MADISON, Wis. – Thanks to President Biden, Senator Baldwin, and Reps. Kind, Moore, and Pocan, Wisconsin is receiving over one billion dollars to fund Great Lakes community projects and further improve water infrastructure across the state.

In 2022, the Biden-Harris administration is investing [\\$14 billion](#) from President Biden's Bipartisan Infrastructure Law to fund 500 waterway projects across 52 states and territories. These projects will strengthen U.S. supply chains by reducing shipping bottlenecks and increasing our nation's resilience to climate change.

Despite every member of the Wisconsin GOP voting against this once-in-a-generation infrastructure investment, the following Wisconsin communities and projects will benefit from this [funding](#) :

Western Wisconsin

- \$830 million for the Navigation and Ecosystem Sustainability Program to modernize locks and dams on the Upper Mississippi River

WI Projects Benefiting from Infrastructure's Great Lakes Funding
