Investments will support fire station construction and expansion projects, testing sites and EMS projects

APPLETON — Gov. Tony Evers today, at a stop on the Department of Health Services' Thank You Tour for Public Health Workers, announced new investments for emergency response projects under the previously announced Neighborhood Investment Fund and Healthcare Infrastructure Capital Grant
pandemic response programs. An additional $22 million investment will target support toward fire station construction and expansion, emergency medical services (EMS) and emergency medical response (EMR) program support and expansion projects, and a permanent drive-through immunization and testing site.

Gov. Evers earlier this year announced more than $200 million in awards through the Neighborhood Investment Fund and nearly $100 million in the Healthcare Infrastructure Grant programs, respectively, to go to projects in communities throughout Wisconsin.
