

MILWAUKEE - We weigh in on two national issues, first the horrific shootings in Georgia that appears to be yet another hate crime against the AAPI community, and the looming battle over the Senate filibuster and the future of the Democratic agenda.

We discuss Speaker Vos's declaration this week that the Legislation will reject the very popular plan to accept available federal money to expand BadgerCare, turning down \$1.6 billion dollars supercharged by the rescue package, denying health care to the working poor during and pandemic. Is Vos serious with dozens of potentially vulnerable Republican state legislators weigh their fate heading into redistricting or it a bluff? Vos also plays scrooge yet again, declaring the Assembly is not willing to suspend a one week waiting period for unemployment benefits despite 100% federal funding in the rescue package.

In yet another embarrassment, Legislative Republicans shamefully “honor” racist demagogue Rush Limbaugh while refusing to honor Black History Month. In other news, Foxconn, the white elephant of Racine County, says they might make electric cars... or maybe a monorail. Will they ever make anything that Donald Trump and Scott Walker promised in return for billions of state money?
