

MILWAUKEE - We discuss Legislative Republican’s scheming with their corporate patrons such as Wisconsin Manufactures and Commerce (WMC) to gin up a fake “worker shortage” to punish the unemployed. Does Robin Vos really believe Wisconsinites are lazy and irresponsible or is he just trying to exploit the working class? In a clear effort to mobilize a 2022 off-year election base of anti-vaxxers and conspiracy theorists, Legislative Republicans are supporting bills to make anti-vaxxers a protected category and pumping life into the “Big Lie” with bogus “Arizona style” voter fraud investigations into the 2020 election. Meanwhile new data from the Wisconsin Election Commission demonstrates minuscule voter fraud in Wisconsin elections, most of it generated by Jim-Crow still disenfranchisement of released prisoners. We close with a discussion on the centrality of the Senate filibuster in the success of the Biden agenda, addressing the nation’s major challenges and needs, and the survival of democracy itself.
