

MILWAUKEE - We welcome the Fair Elections Project's Sachin Chheda to discuss the breaking news on redistricting. The 2020 census data has just arrived from DC, the lawsuits have begun, and a new Harvard report ranks Wisconsin the least democratic state in the nation, classifying it a “democracy desert”. Our panel also talks about worsening COVID infection and hospitalization rates, and the controversy over the Biden Administration's decision to authorize a third dose when big Pharma is still denying it to most of the world. Robert updates us on the dramatic and historically significant Congressional battle over the President’s Build Back Better agenda.
