MILWAUKEE - We discuss the implications of a new Billionaires Report Citizen Action released this week with Americans for Tax Fairness. The report shows how the nation's billionaires are pumping tens of millions of dollars into the 2022 midterm elections, mostly backing Republican candidates for Congress who will cut taxes for the ultra-rich and the corporations they own. The panel talks about the unelected Federal Reserve's policies to tamp down inflation. Is this Wall Street-dominated body using class warfare to address the economic issues caused by the ultra rich and our dysfunctional Congress? In yet another bombshell from the January 6th Committee, evidence mounts that that Trump personally orchestrated the attack on the Capitol. Does this mean our timid Attorney General will bring charges? We also review a horrendous Wisconsin Supreme Court session, and announce Citizen Action's endorsement of Sara Rodriguez for Lt. Governor and Angelito Tenorio for Secretary Treasurer.
