

MILWAUKEE - We shed light on the misleading media coverage of the latest MU Law Poll, which finds both the Governors and U.S. Senate races are a dead heat. Did the TV saturation of racialized attacks on Mandela Barnes influence any specific subset of voters? We applaud Sarah Godlewski's new PAC to expose Sen. Johnson on abortion and support 6 women candidates running for important state legislative seat. Robert reviews new campaign contribution data that reveals Corporate America as the real power behind MAGA and the assault on democracy.

We welcome UW Health nurse Shari Signer to discuss this week's narrowly avoided strike, next steps for the nurses, and their role in helping inspire a rebirth of labor organizing. New data reveals the lowest child poverty rate in America ever measured thanks to President Biden's policies, especially the Child Tax Credit. Will Democrats in the Senate make it permanent? We close with Matt ranting again against the un-elected Federal Reserve Bank.
