We have bled our soldiers and other peoples of their blood, spent trillions of dollars that should have gone to building a better life for all Americans. A Vietnam War era and Korea veteran says it's time to stop.

TUCSON, AZ - Generals want another surge in Afghanistan. Only 5,000 will do the trick to help the peace process they say. Kill and bomb more people to encourage people to negotiate for peace. Do you believe it? The generals don't say they need more troops in Iraq or Syria or Libya or Africa ---- YET.

We Americans are persistent. But when it comes to wars, we exhibit perseveration defined as "...the inappropriate persistence or repetition of a thought or action..."

"Repetition of thoughts" – example: war is the answer to all diplomatic problems. "Repetition of actions" – example: we accept lie after lie from our presidents pushing us into wars.

In Vietnam, Afghanistan, Iraq, Libya and Syria, tens of thousands of Americans have died along with millions of Asian and Middle Eastern peoples. One lying president after another tells us the sky is falling. It's the commies, the horrible dictators, the treacherous religious terrorists. By late 1967 when the surge of American troops was really building in Vietnam, Pres. Johnson knew the war was a loser, as did Sec. of Defense McNamara, but both continued to lie and lie. And people continued to die and die. For what? Pride? Corporate empire? Presidents prey on our fears. We citizens accept the lies and off our youth go to war after war.

These politicians aren't really interested in communists or terrorists. Politicians want the oil, gas, copper, tin, titanium, or markets for their 1%er corporate friends. They know war is good for their political career. And they will be rewarded by a grateful military industrial complex. WalMart, GM and so many others do hundreds of billions of business with the "commies" in

China and Vietnam without a blink of the eye.

The oil soaked Middle East dictatorships like Saudi Arabia and Qatar fund the schooling, training and operations of religious terrorists yet these dictators are our buddies -- buying billions in American weapon systems. Simultaneously, we send our youth to fight the religious terrorists our CIA and these dictatorships created. And our military/industrial complex makes money providing weapons to both sides.

We have bled our soldiers and other peoples of their blood. We have bled our Nation of trillions of dollars that should have been spent building a better life for all Americans. War profiteers, CEO's and share owners make hundreds of billions while the under funded Veterans Affairs hospitals try to take care of all our physically, mentally and morally crushed soldiers. And military families pay the highest price of all - dead and damaged loved ones.

The CIA with its mercenaries, billions and bags of tricks is forever starting wars saying it is trying to "save" a democracy or promote democracy or freedom. Then, American soldiers step into the quicksand of war. Wars don't create peace. They create the silence of death. Bullets, torture or assassinations kill people but cannot kill ideas.

These are illegal wars of aggression - illegal under our Constitution and the United Nations Charter. The reason starting an illegal war is the greatest crime is because all other crimes will then be committed: murder, torture, rape, starvation, theft, religious, political or sexual persecution, genocide, repression... Everything imaginable takes place during war. Military leaders know wars are easy to start. They also know -- no one knows how to stop them.

And now Pres. Trump is supposed to decide if we need another surge of 5,000 American troops in Afghanistan. **AFTER 16 YEARS OF DESTROYING AFGHANISTAN, WE NEED TO GET OUT!**

We must admit that in the present wars, we are on the side of the gangsters, drug kings, murderous militias, dictators, torturers and power hungry religious fanatics.

What we've done in these countries has NOT worked. Our wars and weapons have pushed these countries from bad to worse. Millions are homeless and refugees. Their hatred will last decades or centuries.

We need to admit to the United Nations our failures and ask the UN to conduct peace negotiations in each nation. We must support those negotiations, pay the costs, withdraw all our troops and military equipment, stop the bombings and drone attacks and stop the surveillance and training assistance.

There has been too much killing to feed the unsatiable greed of our military/industrial/politician complex.

Citizens, we must prove we support the rule of law rather than the rule of empire or whim. We must prove we will NOT accept more lying and corruption.

We must impeach those presidents and generals who have led these illegal wars! We must make them examples of what America will do when elected leaders and generals forsake their oaths to preserve and defend the Constitution of the United States of America and when they betray the American people.

Between 45 million and 85 million died in WWII. In a nuclear war with nations using just 1% of their nuclear weapons, it's estimated tens of millions would die in the first hour. Millions would die afterwards from radiation effects and firestorms. Those firestorms, sweeping large areas creating dark dust clouds, would cause a worldwide, extended winter of possibly 10 years with drastically shortened food growing cycles. Two billion would be threatened with famine. Life on earth, as we know it, would be gone.

We must stop the wars. Stop creating wars. And stop supplying weapons to all sides.

We must request the UN take leadership in trying to peacefully resolve the quagmire we have helped create. Or, our posterity will eventually suffer the same cruel fate millions of families are presently suffering in the Middle East.
